 Panama City, FL  (510) 717-6564  vincentejosereyes@gmail.com  vincereyes.dev  vincentereyes

SUMMARY

Software Engineer and IT professional with over 3 years of experience designing, building, and supporting enterprise web applications and system infrastructure. Technical background includes developing within SAP platforms, implementing scalable solutions, and managing secure networked environments. Proven ability to operate within Agile/Scrum workflows, collaborate across cross-functional teams, and optimize software system sustainment.

EDUCATION

BS Information Technology

St Paul University Quezon City

2011 - 2017

Software Development Cert.

Coding Dojo - San Jose, CA

2018

SKILLS

Core Development:

React, Angular, TypeScript,
JavaScript, Swift, Python, HTML5,
CSS3, REST API

Methodologies & Tools:

Agile/Scrum, Sprint Planning, Git,
Jira, Confluence

IT & Environments:

MS Windows
10/11, macOS, Network
Administration (Cisco Meraki,
VPNs)

Databases:

MySQL, Firebase

ACHIEVEMENTS

- Triple Blackbelt – Coding Dojo (iOS, MEAN, Python)
- Improved application stability from frequent crashes to near-zero incidents
- Maintained 4.4+ App Store rating with top category performance
- Top 2 Student in Programming – St. Paul University

EXPERIENCE

Mar 2022 -

Sept 2024

SOFTWARE ENGINEER | SAP | PALO ALTO, CA

- Leveraged web development experience to design and build user interface components within the SAP Business Network platform.
- Collaborated on user stories, grooming sessions, and daily Scrum events alongside PM, UX, and QA teams to deploy production-ready software baselines.
- Integrated REST APIs with backend services to enable secure, high-volume data exchange across sophisticated business platforms.
- Conducted peer code reviews and performance optimizations focused on system usability, long-term sustainment, and operational reliability.

Nov 2020 -

Feb 2022

IOS MOBILE APP DEVELOPER | LAY BARE | PHILIPPINES

- Developed and sustained customer-facing software applications utilizing Git-based configuration management version control.
- Formulated code solutions and software revision updates to handle backend features supporting secure data transmissions, real-time live chat, and authentication models.
- Tracked and resolved critical trouble tickets, successfully reducing application crash metrics from 11 daily incidents to zero.

Oct 2018 -

Apr 2020

IT SPECIALIST | UPLIFT, INC. | MENLO PARK, CA

- Supported 150+ users across Mac and Windows environments (on-site and remote)
- Managed network infrastructure including Cisco Meraki, VPN, and multi-site office setups
- Administered SaaS platforms (Google Workspace, Office 365, Azure AD, Slack, Jira)
- Led IT procurement, vendor coordination, and security/compliance initiatives
- Automated internal processes using Python, CRON jobs, and Raspberry Pi systems

2017

FIELD IT TECHNICIAN | YADAV ENTERPRISE | FREMONT, CA

- Installed and troubleshoot hardware, software, and network systems across 200+ client locations
